CURRENT SITUATION

Situation Summary:	California Interagency Incident Management Team 5, a Type 1 Incident Management Team, has assumed command of the incident as of 0600 hours and will continue to work closely in Unified Command with the Los Angeles County Fire Department. Poor overnight humidity recovery allowed the fire to remain active moving into drainages with downslope winds and critically dry fuels and made short runs to the ridges primarily on the western flank. Warmer and drier conditions are forecasted for today as an excessive heat warning takes effect at 11 AM. Near critical fire weather conditions could develop this afternoon and evening as gusty onshore winds could combine with warm and dry conditions in place. Current objectives include keeping the fire North of Castaic Lake, South of Highway 138, East of Red Rock Mountain, and West of Tule Ridge. Damage assessment teams are actively assessing the areas impacted by the fire and will provide updated information as it becomes available.
